

Dillon

You can always find Dillon smiling! Before Chakota was created, Dillon's Mom and Dad had taken him to Florida for Therapeutic Horseback Riding. They were thrilled when they talked to Kay one night, and they found Chakota was about 4 miles from their house! That first year, Dillon rode quite a bit, but he is extremely sensitive to the heat. The following year, Mother Nature was horrible and he didn't ride much at all. But the last few years he has been back as much as possible and his parents say they can always tell

when he rides more consistently. We must share that when Dillon first started riding, he was one that required a back rider to help support his trunk and neck. Over the years he has progressed where he no longer needs a back rider and sits on his horse very well. His Team is always challenging him with new positions, and he rewards them with noticeable improvements and endless smiles!
