

Friday

Friday was born on May 13, 1988 in Farmington, Missouri. For the first four years of his life, he was in a very bad place. His owners at the time had chased him into his stall because they couldn't catch him in the pasture. Then when they got him in the stall, they felt the need to beat his head with a 2x4 to punish him for not letting them catch him. They damaged his left eye where he only sees shadows to this day. He was rescued a few months later by Lynn & Ralph Morgan where he received lots of love, training and

support. He went from being hard to handle to an excellent trail horse and was rode in numerous parades. Dave had been looking for an experienced horse for Kay to ride and feel comfortable with. When he found out Friday was available, it was an easy choice. Friday became Kay's dream horse. It was during that time that Kay & Dave were starting Chakota TRC, and they both knew that he would be the perfect horse to start their Therapeutic Riding Center. He has now been with the program for nine years and continues to be the horse of choice when new Riders and families come out for their Meet & Greet. He wins over everyone's heart and opens the doors for many new individuals interested in Chakota.

Friday turned 26 last year, his favorite treats are still peppermint candies, and he will stand for hours and let you scratch his neck!!
